

## **AEROCROSS SYSTEMS TO PRESENT "BRILLIANT EYES" HMD AT EAA AIRVENTURE OSHKOSH**

July 27, 2013 Press Release

*Innovative and affordable smart glasses head-mounted display technology for General Aviation to be showcased in new Innovation Pavilion*

McKINNEY, TX- Aerocross Systems announced today that it will exhibit at EAA AirVenture Oshkosh Convention and Celebration, taking place from July 29 to August 4 in Oshkosh, WI.

Exhibiting in the new Innovation Pavilion, booth 17, Aerocross will demonstrate its recently flight tested Brilliant Eyes™ smart glasses Head-Mounted Display (HMD) concept featuring lightweight, optical see-through Augmented Reality (AR) technology.

Brilliant Eyes™ is the world's first AR HMD created specifically for General Aviation. The smart glasses system serves to enhance situational awareness by allowing the pilot to see critical flight symbology while keeping his/her eyes focused outside the cockpit.

A prototype/concept demonstrator unit and flight test videos will be available for inspection. More information about the convention can be obtained at <http://airventure.org>

Aerocross invites all interested individuals and companies to stop by our booth for an "eyes-on" experience during the show. For additional information, contact can be made by e-mail at [info@aerocross.com](mailto:info@aerocross.com) or by phone at (214) 642-4826.

### **About Aerocross Systems**

Aerocross Systems is headquartered in McKinney, Texas. The small company specializes in the design, rapid integration, low volume manufacturing, and testing of innovative and cost-effective aerospace systems
